

i+ solutions
universal access to essential medicines

Our approach

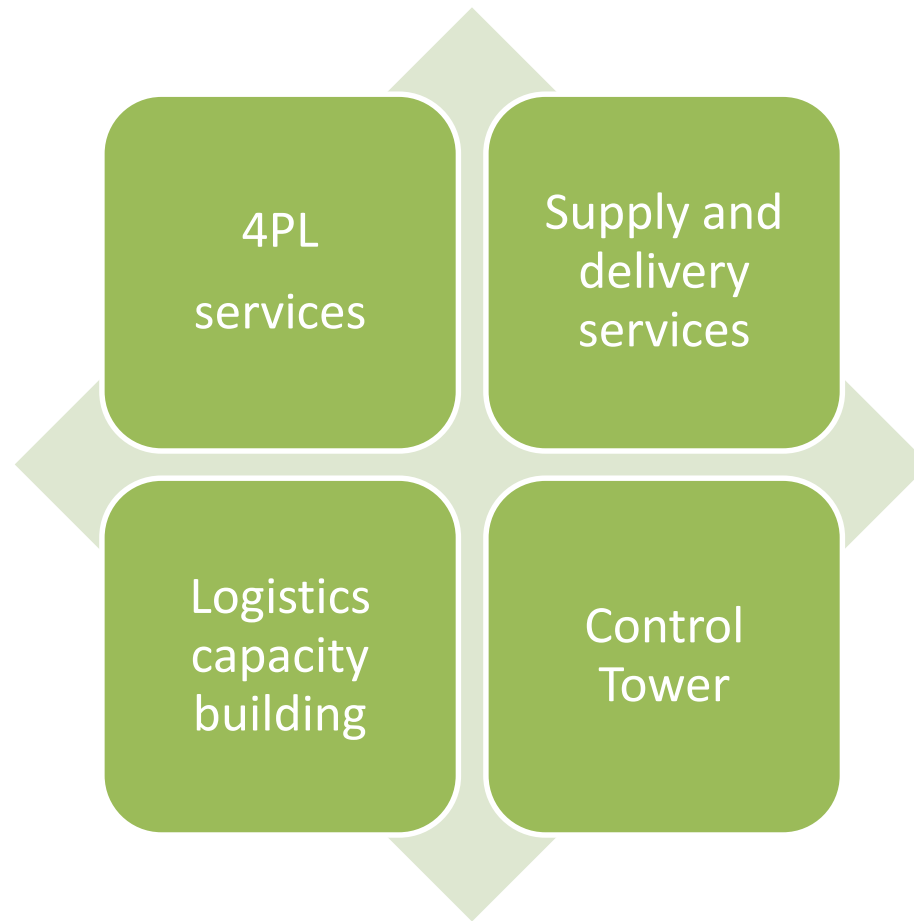

Our propositions

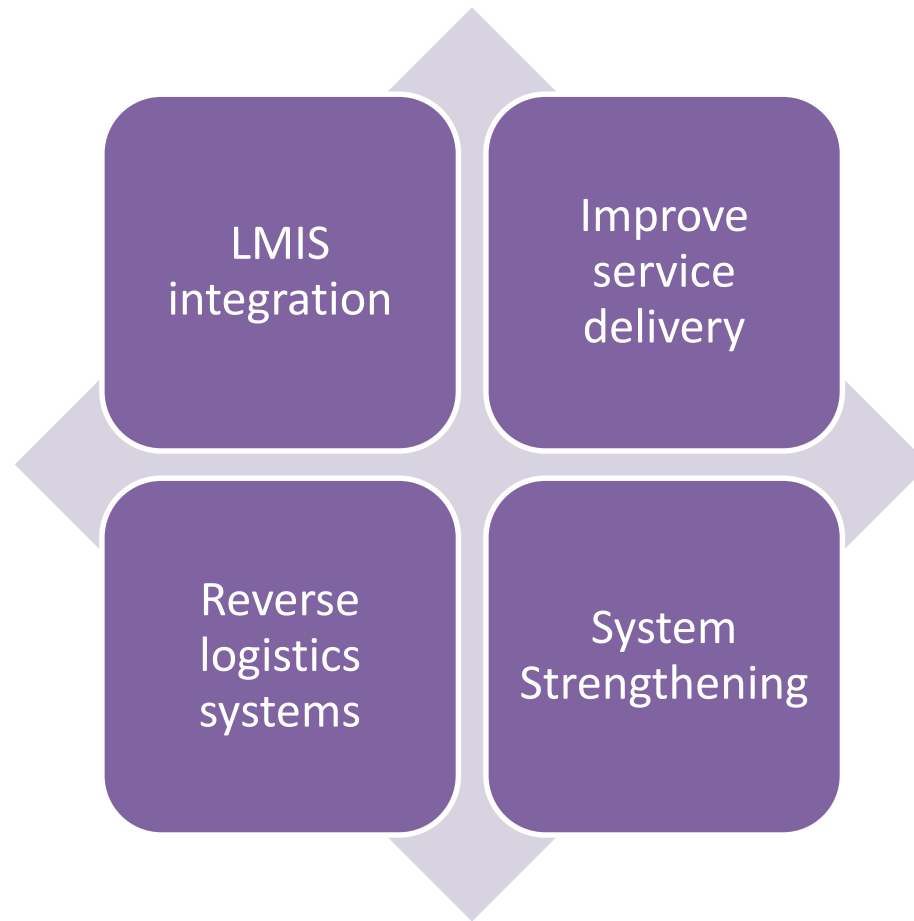

Pooled Procurement Mechanism (PPM) for Global Fund

- Over **US\$ 2 billion** of life saving medicines procured
- Contributed to **3.9 million patients on ART per year**
- Annual procurement of about **81 million** malaria treatments
- Supplied to **58 countries**
- **85%** on time delivery

Global logistics and supply chain management

In-country supply chain improvements and system strengthening

Nigeria Supply Chain Integration Project

Vision:

- Improved patient access and availability of medicines – through visibility, control and efficient Last Mile delivery.
- Tighter integration of National Pharmaceutical supply chains between Federal & State, Donors, Public & Private Sector, and across commodities - HIV, Malaria, TB and by platform extension to Family Planning and Vaccines.
- A streamlined, cost effective and ultimately more sustainable National Pharmaceutical Supply Chain.

Key elements:

- Strengthening **Federal & State Government** coordination.
- Public Private Partnerships – for a **network of Zonal Hubs (Warehouses)**.
- **Integrated Logistics and Transportation** including Last Mile Delivery.
- Establishment of **Logistics Management Coordinating Units (LMCU)** at State level and deployment of Logistics Management Information System (LMIS) tools.

Sexual Reproductive health: Burundi, Rwanda, DRC

- Increase use of contraceptives amongst youth, creating more demand and addressing supply barriers (our role).
- Assessments and trainings. Result: provision to targeted districts is under control

 **Low level stock-outs, eliminate expiries**
Capacitated staff

- Developed market dynamics tools for SRH commodities
- Ministries of Health in Rwanda, Burundi and DRC request additional support to fight last challenges, upscale towards country wide implementation and include other medicines in strengthening SCM

Wings for Aid

helping humanitarian aid organisations bridge the last mile

FCMI+ / Market Intelligence

Female Condom Market Intelligence (FCMi)

FCMi's market intelligence section provides visitors information regarding the procurement and supply of female condoms:

1. **Interactive Map:** *information on those organisations involved in the production, bulk procurement and testing of female condoms*
2. **Product Briefs:** *information on the range of female condoms either on the market or in the advanced stages of development*
3. **Company Profiles:** *introduction to those organisations involved in the development and manufacture of female condoms*
4. **Indicative Price Index:** *indicative price information for a range of female condoms that are currently available on the market*
5. **Product Progress:** *update on product development, market access and eligibility for bulk procurement*
6. **Product History:** *a modern history of the female condom*
7. **News Archive:** *FCMi's featured news items*

For details on how FCMi collects and disseminates market intelligence, refer to [FCMi's Guidelines and Disclaimer](#).

How to keep improving healthcare?

- Innovations in the crossroads of health, pharma and logistics
- Applied research (cross-sector, e-market ICT, control tower technology)
- Leapfrogging (Uavs for medicine distribution to remote areas, M-health)
- Tailor-made solutions for Ministries of Health
- Bring donors, Ministries of Health, NGO's and private sector together for collaborative innovations
