Relation between level of education and (healthy) life expectancy

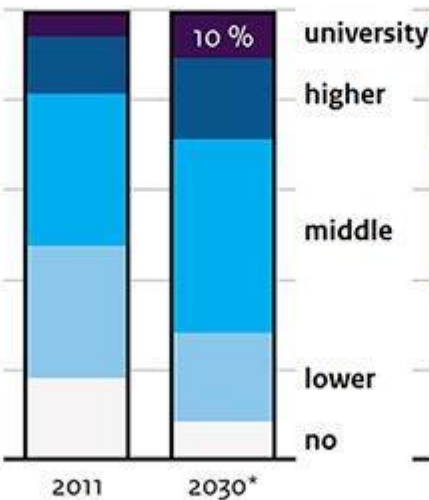

umcg

New labour force of 65-68 years old

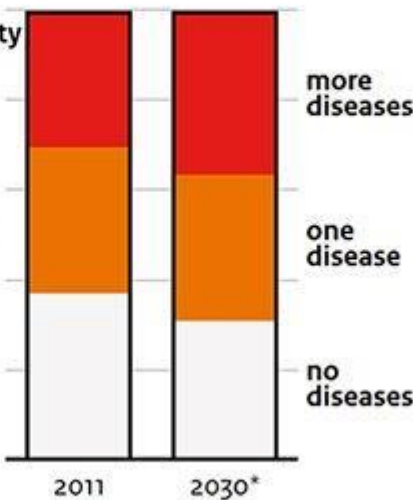

An increasing retirement age prevents a decline in the total labour force.

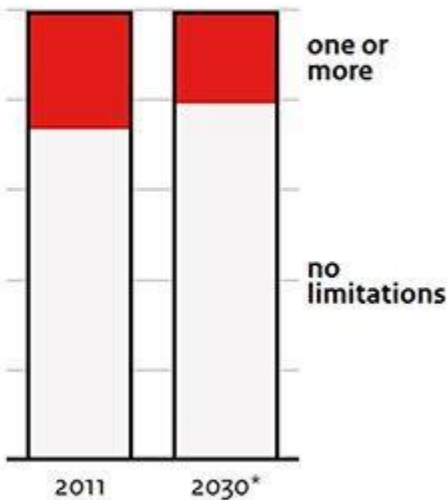

The new labour force: is higher educated...

... has more often a chronic disease...

... but less often activity limitations.

* based on 65-70 years old

umcg

Health care expenditures by disease category in billions of euros in 2011

€ 67 billion

€ 13 billion
About 16% of costs are not
attributable to diseases

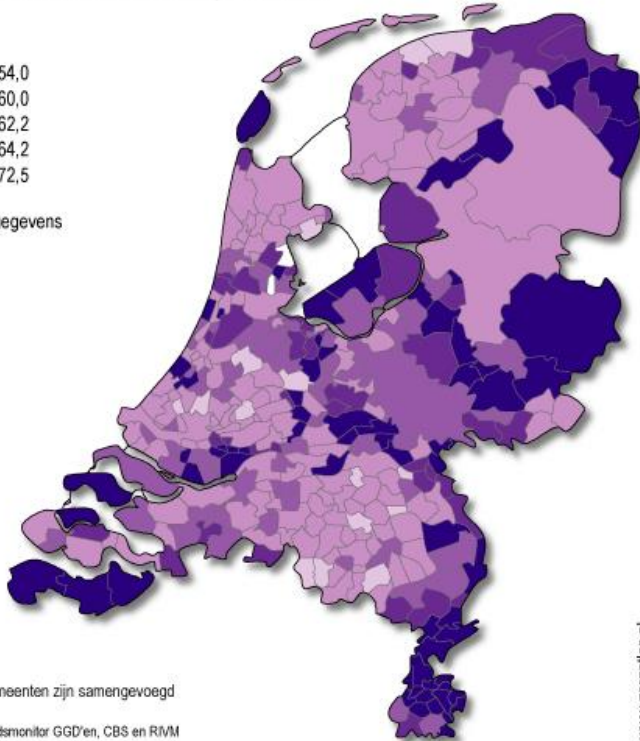

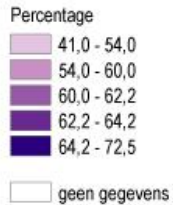

umcg

Chronic diseases

Chronic diseases

Groningen (north and south-east): 62 to 72 %

Eén of meer chronische ziekten 2012
per gemeente*, volwassenen van 19 jaar en ouder

* Een aantal gemeenten zijn samengevoegd
